

PRODUCT INFORMATION

Antifreeze (Concentrate)

Gulf Antifreeze

Product Description:

Gulf Antifreeze is a modern 'British-Standard quality antifreeze composed of mono-ethylene glycol under addition of additives. **Gulf Antifreeze** can be used throughout the year in all cooling systems in petrol and diesel engines. Thanks to the balanced additives package and high quality mono-ethylene glycol, this standard quality antifreeze belongs to the highest quality in the market. Before use, **Gulf Antifreeze** needs to be diluted in the recommended proportions with water.

Features/Benefits:

Gulf Antifreeze gives best protection if it is used in concentrations up to 25 % to 50 % in water. **Gulf Antifreeze** offers good protection of all metals in the cooling system and engine and is neutral with regard to seals and flexible hoses and gives very good resistant against foaming.

Warning: **Keep all antifreezes out of reach of children!!! Do not drink antifreeze!!!
If swallowed, induce vomiting and immediately call a doctor!!!**

Gulf Antifreeze (Concentrate)	
PRODUCT CODE	6900
SPECIFICATIONS:	
BRITISH STANDARD	BS 6580
AFNOR	15-601
ASTM	D3306
SAE	J 1034
CUNA	NC 956-16

TYPICAL PROPERTIES:	
DENSITY @ 15°C, kg/m ³	1130
pH 33% in water	8
RESERVE ALKALINITY, ml	>20
CRISTALLISATION POINT @ 25% antifreeze/75% water	-14 °C
CRISTALLISATION POINT @ 40% antifreeze/60% water	-26°C
CRISTALLISATION POINT @ 50% antifreeze/50% water	-36°C
COLOUR	Blue
